Summary

Full-stack developer with 2+ years of experience specializing in C#, .NET, and modern web technologies. Built scalable applications including game server infrastructure with C++/LUA/PHP and production-ready web platforms using React, Next.js, and ASP.NET. Passionate about clean architecture, performance optimization, and creating intuitive user experiences.

Experience

2025 - Present

Full-Stack Developer @ Vällingby Körakademin AB

Leading development of driving school platform with Next.js frontend and .NET Core backend. Implementing Stripe payment integration, student management dashboard, appointment scheduling, and real-time notification features.

2024 - Present

Full-Stack Developer @ Freelance

- Engineered a custom Tibia server using C++ for core systems, LUA for extensible scripting and PHP for administration interfaces. Implemented Docker containerization for deployment and MySQL for database management.
- Built media database with RESTful APIs, trending content discovery and user collection management
- Developed gaming database with Umbraco CMS, custom API integrations and dynamic frontend rendering
- Built E-commerce platform featuring CRUD, shopping cart, checkout system, user auth & coupon service

2024 - 2025

Back-End Developer @ Carelyo Inc

Implemented secure payment infrastructure for eHealth platform using Stripe integration. Developed authentication systems with bearer tokens, secure checkout processes, and payment processing workflows. Ensured PCI compliance and data security while integrating with existing product management systems.

2023 - 2025

Security Guard @ Rapid Säkerhet AB

Monitored and operated advanced security systems and access controls across multiple client sites. Conducted regular patrols, security checks, and coordinated incident response operations. Ensured compliance with safety protocols and maintained detailed activity documentation.

2022 - 2023

Delivery Driver @ PostNord AB

Managed daily package distribution routes and ensured timely deliveries to both residential and business customers. Maintained high service standards through direct client interactions and efficient route planning. Contributed to PostNord's logistics operations with reliable package handling.

2017 - 2022

Video Coding Specialist @ Randstad AB

Analyzed package images and processed shipment data for postal systems. Reviewed customs declarations and ensured regulatory compliance. Developed strong attention to detail and organized workflow skills.

Education

2023 - 2025 Stockholm, Sweden

Nackademin Yrkeshögskola

Web Developer .NET with CMS Specialization

.NET development program focused on building web applications, e-commerce systems, and CMS platforms. Learned Microsoft .NET, RESTful APIs, responsive design, and modern web development. Completed hands-on internship in professional development environments.
